

# What fresh new hell is this???

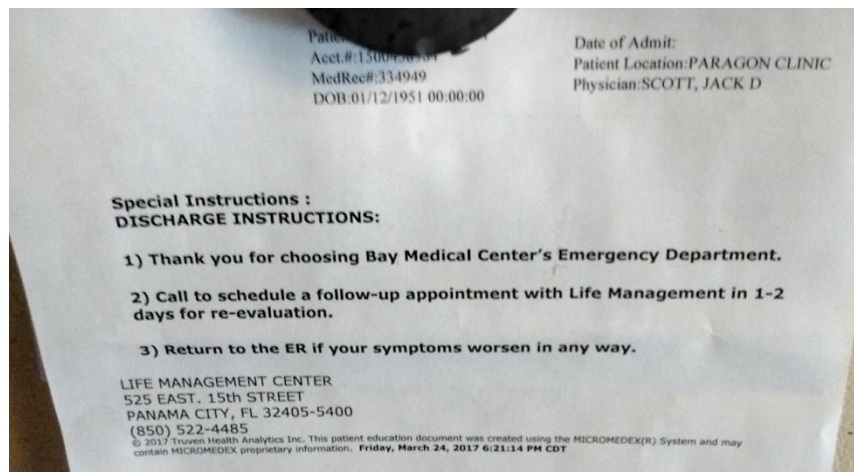

March 24, 2017 – Panama City, FL

Recently, Bikeman became sick with an unknown illness, causing him to lose a significant amount of weight in a short time. And as if this symptom was not bad enough, the illness was also causing mild hallucinations, and a loss of appetite. When he checked in at the Paragon Clinic (formerly Bay Medical), and made to wait nearly 6 hours to be seen, the doctor on call, a Jack D. Scott MD only did a precursory visual examination, and claimed there was nothing wrong with Bikeman.

Does this look normal to you?

To add insult to injury, this so-called physician's only recommendation was to schedule a visit with Life Management Center of Panama City ... a local mental health facility.

Why are doctors such as this allowed to practice medicine in this country at all?
